

Exercise 5 - Protecting Pages

[Submit Assignment](#)

Due Sunday by 11:59pm **Points** 15 **Submitting** a file upload
Available after Mar 19 at 8am

For this week's exercise we are going to follow along with the video lectures and complete the functionality.

- Copy your files from Exercise 4 into your Exercise 5 folder
- Modify your config.php to correctly reflect the new directory.
- Create the logout method in the login controller
- After logging out return the user to the home page
- Modify your parent controller to allow for protecting pages
- Protect your addpost page
- Redirect a user that logs in correctly to the page they were previously on
- BONUS +5 - Display a message telling the user they have logged out successfully when returned to the home page

This exercise is worth 15 points and will be graded accordingly:

2 pts if I can logout successfully

5 pts if I cannot access the addpost page when logged out

3 pts if the login screen returns me to the addpost page when I successfully login

5 pts code structure and attention to detail

When you have completed the assignment upload your files here and provide me with your Corsair link and the link to your GitHub repository containing the exercise files in the comment field..

A working example of this exercise can be found

here: <http://corsair.cs.iupui.edu:19031/CIT313/SP2015/ex5/>
